

PHARMACIES WITH STANDING ORDERS TO DISPENSE NALOXONE

Naloxone and How it Can Save a Life

Naloxone is an opioid antidote medication designed to reverse the life threatening effects of an opioid overdose. Many pharmacies dispense naloxone without an individualized prescription, using a "standing order" from a physician or the Department of Health.

You can obtain Naloxone from your local pharmacy even if you are not the intended user, but a family member, friend, or care giver.
