Dear Township Clerks & Managers,

The Warren County Mosquito Control Commission is planning a treatment for adult mosquito control in your township(s). Please share this information with your residents and let them know that they can call us or visit our website for more information or with questions/concerns.

The following application will be made with a truck-mounted ultra- low volume sprayer. The truck is well marked as a mosquito commission vehicle. The application will be made as close to sunset as possible in order to increase its contact with actively flying mosquitoes. Spraying for adult mosquitoes is done on a limited and very localized basis to protect the public health from mosquito-borne illnesses.
